

Pacific Curriculum Design and Facilitation

Pacific Curriculum Design and Facilitation is a foundational development opportunity for enhancing skills for individual and organisational learning and building collective responses to current and emerging challenges.

Effective learning organisations are quicker in assessing challenges, creating opportunities and overcoming setbacks. Central to the growth of learning organisations is the role of leaders in facilitating and creating meaningful conversations which encourage collective engagement, listening and learning.

This program is designed to develop skills to plan, organise and facilitate learning in the workplace. Participants will develop skills to help design and develop learning processes, plan assessment activities and processes.

Pacific Police Training Advisory Group (PPTAG) Leadership Framework

BUILD	NAVIGATE	DISCOVER	LEAD
